PROFESSIONAL SUMMARY

Motivated BSc.CSIT student with hands-on experience building modern web applications using React.js, Node.js, Express.js, MongoDB, and Appwrite. Strong learning mindset with the ability to adapt quickly, work collaboratively, and complete projects independently. Seeking to grow as a Software Development Fellow through mentorship, disciplined execution, and practical software development experience.

TECHNICAL SKILLS

Languages: JavaScript, C, C++, Python (Fundamentals)
Frontend: React.js, HTML, CSS, Tailwind CSS, Axios, Framer Motion
Backend: Node.js, Express.js, MongoDB, JWT Authentication
Tools: Git, GitHub, VS Code, Postman, Figma, Appwrite

PROJECTS

OpenJournal – Full Stack Blogging Platform

[Live Demo](#) — [GitHub](#)

- Built and deployed a full-stack blogging platform using React.js and Tailwind CSS
- Integrated Appwrite for authentication, database management, and image storage
- Implemented full CRUD functionality with secure user-specific data handling
- Engineered protected routes and personalized user dashboard system
- Optimized state management using Redux Toolkit for scalable architecture

BloodDonation – Emergency Blood Connectivity Platform

[Github](#)

- Designed and developed a UI/UX-driven platform connecting health organizations with nearby blood donors
- Engineered a real-time request system allowing organizations to send alerts based on blood type and location
- Built donor dashboard enabling users to accept/decline requests and track donation history
- Implemented status tracking system for monitoring completed and pending donations
- Designed user flows and interfaces using Figma and implemented using React.js and Tailwind CSS

YouTube Backend Clone (In Progress)

[GitHub](#)

- Developing scalable REST APIs using Node.js, Express.js, and MongoDB
- Implementing JWT-based authentication and role-based user management
- Designing modular backend architecture for video, user, and interaction services

EXPERIENCE

Lead Frontend Developer & Coordinator – Hackathon Project

36 Hours

- Led frontend development for a blood donation platform that helps connect donors with people in urgent need
- Collaborated with a 4-member team to architect a MERN-based solution under strict time constraints
- Developed responsive and user-centric interfaces using React.js and Tailwind CSS
- Coordinated task distribution, UI consistency, and integration between frontend and backend components
- Successfully delivered a functional prototype within 36 hours during hackathon execution

Volunteer Computer Instructor

2 Months

- Taught computer fundamentals to Class 12 students
- Strengthened communication, leadership, and mentoring skills

EDUCATION

BSc.CSIT

Patan Multiple Campus, Tribhuvan University
4th Semester

Expected Graduation: 2028

+2 Science

Grand Academy, Kumaripati, Lalitpur

SEE

Little Angels School, Hattiban, Lalitpur
